Latest news and other goodies

Tough times -

Some words from our CEO Jörgen

Almost daily we are told that

- electricity price hits new records
- fuel prices go up
- interest rates go up
- inflation increases
- the number of bankruptcies is increasing.

When will it all end?

Help your customers save a lot of money with products from Greenman.

Our toners are always cheaper than the original.

The customer can in some cases save many many euro's on each Greenman Eco Original compared to an original toner. This can give your customers savings of 100s and even 1000s of Euro's on the bottom line. For some, it might be the difference to going bankrupt.

Convert your original toner sales to Greenman. Better price for you, better price for customer plus better for the environment = Tripplewin

Jörgen Wonisch
VD, Greenman AB

World Vegetarian Day

On October 1 every year, Vegetarian World Day is celebrated. This day is instituted by the International Vegetarian Union which was created in 1908 in Dresden, Germany.

One way to think about the environment is to eat less meat as meat production is a major environmental culprit when it comes to greenhouse gases and emissions. 93% of everything grown in our fields in the EU goes to animal feed instead of food for us humans.

Oscar who works here at Greenman mostly eats a vegetarian diet. If you haven't tried before, he recommends Halloumiburger. It is both very tasty and very filling. 🍔 😊

Notice!- HP has just now implemented an update on the software for the CF530 & CF540 series.

Toners already installed in the printer work without remark even if the software is updated.

New Greenman toners which are to be installed only works if the customer has not made the new software update on the printer. Thankfully, it is very rare for customers to update the software on these printers.

Most updates are harmless to our users of Greenman products, but sometimes the original manufacturers put a changed code into the software – as is now the case with the **CF530 & CF540 series**. This means that our toner cartridges or ink cartridges suddenly might not work, or that it stops when a new Greenman product is installed in the printer. Most often, they continue to work if they were already in the printer when the update was made.

In recent years, it is mainly **HP913/953/973, CF540A/X** that this has occurred on.

Recently, it also happened with the **Ricoh IMC2000, 3000 as well as the 4500 series**. Here, toner cartridges that were in the printer stopped reporting toner levels, which gives problems when the printers are installed in an MPS program such as our Autotones service.

So once again, our advice to you is to make sure that your customers do **NOT** have automatic updating preselected on their printers.

It is also incredibly important that you inform your customers that it is not Greenman's products that are unreliable, but that the reason is entirely that the printer manufacturer has changed the code in the software.

Presenting Joakim Palmqvist

Joakim is one of our good guys in the warehouse. He was born and raised in Norrköping and has worked at Greenman since 2004. Just recently, he shocked us all here in the office when, after over 15 years with long hair, he came to work and had shaved off all off his hair. 😊 We like it!

According to rumor in the hallways, Jocke is phenomenal at making sandwichcake. (Sandwichcake is a swedish tradition dating back to the 1940`s)

In his spare time, Jocke plays computergames and watches series. One of the favorite series is "What we do in the shadows?" He plays charactergames and boardgames with friends and he also plays role-playing games.

Five quick ones with Jocke

1. Your best tip to feel good?

A good night`s sleep

2. Your latest text?

Discussions about my new haircut with a friend.

3. What is best at Greenman?

My colleagues

4. What can you not live without?

My computer

5. What do you do on your free time?

Jocke is always eager to help out and find already packed orders for customers who forgot to add a toner or two to their order. He is a really great and appreciated member of our warehouse crew.

Playing role-playing games and board games with friends.

Greenman - 30 year

The company last year celebrated 30 years. Unfortunately, the pandemic was raging at its worst so the celebration had to be postponed, but now we have finally got to celebrate in style

On Friday, October 14, the entire staff was invited to dinner at Restaurant GIN in Norrköping. We enjoyed a six-course menu and some bonus dishes. We got to munch on everything from hake, ox, walleye and chicken in an absolutely fantastic mix. An incredible taste- and drinkexperience.

Now we look forward to the next 30 years. ❤️❤️🥰❤️❤️
